**Blades for FT-8004**

Blades are sold separately. Please choose the one that fits the work.

**G4 series**

- No. G4-1601
- AWG 26
- AWG 24
- AWG 22
- AWG 18

- No. G4-1602
- AWG 26
- AWG 24
- AWG 22
- AWG 18

- No. G4-1603
- AWG 26
- AWG 24
- AWG 22
- AWG 18

**Option**

For big strands

- **FT-8003**
  - The insulator is made of stainless steel, which is suitable for stripping thicker wires.

**G3 blade**

No. G3-1601

**FT-802**

**THERMAL WIRE STRIPPER**

Thermal wire stripper for higher quality and more preciseness

**Specification**

- **Model No.** FT-802
- **Power consumption** 76 W
- **Station**
  - Output voltage: AC 20 V
  - Dimensions: 216 (W) x 161 (D) x 159 (H) mm
  - Weight: 1.4 kg
- **Handpiece (FT-8004)**
  - Power consumption: 70 W (20 V)
  - Cord length: 1.8 m
  - Total length: 153 mm
  - Weight: 147 g

**Packing List**

- FT-802 Thermal wire stripper
- Station (with wire material indicator scale)
- Handpiece FT-8004 (with lead adjuster)
- Hexagon socket set screw (M2.5 x 35 [qty 2])
- Hexagon wrench (127 mm)
- Power cord
- Instruction manual

**NEW**

Tools for Lead and Wire
More sharp, precise, and effective

Thermal wire stripper FT-802 enables higher quality and more precise insulation stripping. The performance that can strip insulation with no nick can meet the requirement of the latest aerospace industry and the medical industry that requires very high quality.

Thermal strip gives great sharpness.

Soft silicone grip can ease work for long hours.

Due to the tweezers structure, the cutting edges are always aligned.
The blades can be securely fixed by making the frame with tweezers structure.

Even very fine AWG 38 can be stripped with standard blades.

Blades are replaceable and a handpiece can be saved.

No need to replace a handpiece when blades get worn out.

Blades can be easily replaced by using the hex-wrench (included in the unit) and the blade removal plate.

* The blades must be cost before replacement for safety.

Space saving by the integration of station and holder

Output setting by the unit of 5%
Easy to set optimum output level as per material

Material | Output value (%)
--- | ---
PVC | 10
PE | 10
PA | 20
PvDF | 30
ETFE | 40
AI | 45
PTFE | 55

* The above values are for reference.

User-friendly display
Status of a handpiece at glance on the display.
User-friendly design for reduction of stress during the work.

- A handpiece is correctly set in a holder.
- Same as the output value.
- Ready to work immediately.
- Auto sleep function will activate after passing the set time.
- Auto sleep function is running.
- Save output value approximately by 50%.
- Reduce blade oxidation and load on heating elements.
- Time to activate auto sleep function can be set by the unit of 1 minute (up to 20 minutes).
