#### Features

#### Thermal strip gives great sharpness.

FT-802 can strip the insulation of AWG 38 wire with no nick.

Conventional wire stripper could make ragged edges of insulation or damage strands.

#### Output setting by the unit of 5% Easy to set optimum output level as per material

	Output value (%)
PVC	10
PE	10
PA	20
PVDF	30
ETFE	40
SI	45
PTFE	55

\* The above values are for reference.

#### User-friendly display

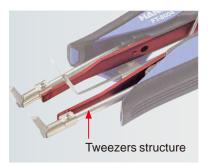

Status of a handpiece at glance on the display. User-friendly design for reduction of stress during the work.

- A handpiece is correctly set in a holder.
- Same as the output value.
- Ready to work immediately.
  Auto sleep function will activate after passing the set time.

## Due to the tweezers structure, the cutting edges are always aligned.

The blades can be securely fixed by making the frame with tweezers structure.

#### Blades are replaceable and a handpiece can be saved.

No need to replace a handpiece when blades get worn out. Blades can be easily replaced by using the hex-wrench (included in the unit) and the blade removal plate. \* The blades must be cool before replacement for safety.

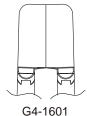

Remove blades.

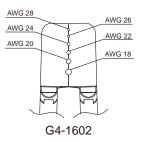

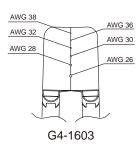

Put removed blades in the holder.
